

Name: _____

Math Buzz

Mr. Endres wants to put fencing around his rectangular shaped backyard. The width of the backyard is 42 feet and the length is two times the width. How many feet of fencing does Mr. Endres need?

answer: _____ feet

Divide.

	5	3	2	0	

Use a protractor to measure $\angle LMN$.

$$\angle LMN = \underline{\hspace{2cm}}^\circ$$

Find the sum. Use the model to help.

$$\frac{2}{8} + \frac{5}{8} = \frac{\square}{\square}$$

Use the model to find the product.

$$27 \times 15 = \underline{\hspace{2cm}}$$

	10	5
20	$20 \times 10 = \square$	$20 \times 5 = \square$
7	$7 \times 10 = \square$	$7 \times 5 = \square$

$$\square + \square + \square + \square = \underline{\hspace{2cm}}$$
